Children's Hospice South West ...

Louise Turner from Children's Hospice South West joined us as a guest speaker on Wednesday 18th March 2015.

The hospice provides care for children with life-limiting conditions and their whole family across the South West. The care which they offer consists of respite and short breaks, emergency care, palliative care and end of life care. Children's Hospice South West operate three hospices; Little Bridge House in North Devon, Chalton Farm in North Somerset and Little Harbour in mid Cornwall.

Dear IT Support

Last year I upgraded from Boyfriend to Husband and noticed a distinct slowdown in overall system performance, particularly in the flower and jewellery applications, which operated flawlessly under Boyfriend.

In addition, Husband uninstalled many other valuable programs, such as Romance and Personal Attention and then installed undesirable programs such as Cricket, Football, Golfing and Continuous TV. Conversation no longer runs, and Housecleaning simply crashes the system. I've tried running Nagging to fix these problems, but to no avail. What can I do?

Signed, Desperate

Dear Desperate

First keep in mind that Boyfriend is an Entertainment Package, while Husband is an Operating System. Please enter the command: "http: I Thought You Loved Me.html" and try to download Tears.

Don't forget to install the Guilt update. If that application works as designed, Husband should then automatically run the applications Jewellery and Flowers, but remember... over-use of the above application can cause Husband to default to Grumpy Silence, Garden Shed or Beer.

Beer is a very bad program that will download the Snoring Loudly Beta.

Whatever you do, DO NOT install Mother-in-law (it runs a virus in the background that will eventually seize control of all your system resources). Also, do not attempt to reinstall the Boyfriend program. These are unsupported applications and will crash Husband.

In summary, Husband is a great system, but it does have limited memory and cannot learn new applications quickly. It also tends to work better running one task at a time. You might consider buying additional software to improve memory and performance.

We recommend Food and Hot Lingerie. Good Luck!
